# Jubayer Ahmed

**FULL-STACK ENGINEER | Laravel, Vue, Nuxt, Multi-Tenant SaaS**

ahmedjubayer54@gmail.com | jubayerahmed.com | github.com/jubayer11 | linkedin.com/in/jubayerahmed54

Remote | Flexible across time zones | Available for distributed teams

## PROFESSIONAL SUMMARY

Full-stack engineer with 6+ years of experience building Laravel and Vue-based web applications, including multi-tenant SaaS platforms, internal tools, and client-facing products. Strong in backend architecture, API design, responsive frontend implementation, and end-to-end product ownership. Proven ability to work independently in remote-first startup environments across billing, permissions, communication workflows, onboarding, and operational systems.

## TECHNICAL STRENGTHS

| | |
|---|---|
| **Languages** | PHP, JavaScript, TypeScript, SQL, HTML, CSS |
| **Frontend** | Vue 2/3, Nuxt 3, Pinia, Tailwind CSS, Bootstrap, Vuetify, SCSS, Vite, Axios |
| **Backend** | Laravel, REST APIs, Eloquent ORM, MySQL, Redis, JWT authentication, queues, caching, role & permission systems |
| **Testing & Quality** | PHPUnit, Vitest, Cypress, documentation-first workflows, code organization, maintainable component design |
| **Architecture & Tooling** | Multi-tenant SaaS design, service/repository patterns, modular backend design, Git, GitHub, GitHub Actions, Netlify, Railway, Laravel Cloud |

## PROFESSIONAL EXPERIENCE

### Founding Full-Stack Engineer | MySportsHive

**Feb 2023 - Present**

*Remote | UK-based startup*

- Own architecture and full-stack development of a multi-tenant sports club platform spanning a public company site, club dashboards, and member-facing applications.
- Designed a modular Laravel 11 API using service/repository patterns, tenant-aware authorization, RESTful integrations, caching, background job workflows, and production deployment support across cloud-hosted environments including Laravel Cloud.
- Built three connected frontends with Nuxt 3 and Vue 3 covering club portfolios, member profiles, scheduling, payments, attendance, messaging, and operational workflows.
- Implemented tenant-aware billing and payment workflows, including Stripe-based platform payments, invoicing, payment status handling, and club-level financial operations.
- Built multi-channel communication workflows across email, SMS, WhatsApp, and in-app messaging alongside onboarding, event/session management, permissions, and audit-aware administrative operations.
- Produced architecture documentation, implementation guidance, and handover materials to support collaboration across distributed stakeholders.

### Senior Full-Stack Engineer / Team Lead | Bitbyteserv

**Sep 2020 - Aug 2022**

*Hybrid*

- Contributed to the architecture and delivery of startup MVPs and client platforms using Laravel, Vue, TypeScript, and WordPress in a fast-paced environment.
- Helped ship multiple web products under tight timelines, including Laravel-based MVPs, custom business workflows, and content-driven client platforms.
- Mentored junior developers through code reviews, technical guidance, and day-to-day delivery support while improving project structure and consistency.

- Maintained and modernized WordPress and custom web platforms, balancing rapid delivery with practical long-term maintainability.

**Frontend Developer | civ.ie** **Mar 2020 - Sep 2020**

*Remote*

- Translated Figma portfolio designs into reusable Vue.js components for a portfolio-builder startup focused on fast template delivery.
- Built responsive user interfaces with Bootstrap, Tailwind CSS, and SCSS while maintaining strong visual consistency across layouts.
- Integrated frontend components with backend APIs and collaborated remotely with designers and developers to streamline the designer-to-development workflow.

**Software Engineer | White Paper** **Jul 2019 - Mar 2020**

*Hybrid*

- Contributed to an internal ERP system using Laravel Blade, including accounting workflows, asset depreciation logic, audit logging, and company-specific business rules.
- Independently developed a learning management system for Bangladesh government primary schools using Laravel and Vue.js, covering school profiles, class setup, materials, exams, and results.
- Worked on property and business workflow platforms using Django, Vue.js, and MySQL, balancing backend implementation with responsive frontend delivery.

## OPEN SOURCE & TECHNICAL WRITING

- Published two reusable Vue 3 packages - vue-dynamic-form-builder and vue-dynamic-table-builder - with demos and implementation-focused documentation.
- Authored 10+ tutorials and technical guides covering Laravel, Vue, Nuxt, TypeScript, and related development topics.

## SELECTED PRODUCT AREAS

| | |
|---|---|
| • Multi-tenant permissions & tenant-aware access control | • Stripe-based billing, invoicing & platform payment workflows |
| • JWT-based authentication, onboarding & account linking | • Admin dashboards, reporting views & workflow tooling |
| • Notifications across email, SMS, WhatsApp & in-app messaging | • Scheduling, attendance & session management |

## EDUCATION

**Bachelor of Science in Computer Science and Engineering (BSCSE)** North South University - Dhaka, Bangladesh | 2016 - 2020

**Higher Secondary Certificate (Science)** St. Joseph Higher Secondary School - Dhaka, Bangladesh | 2013 - 2015
